TLW | Intelligent Lighting Innovations

TLW is a market-leading manufacturer and supplier of innovative lighting solutions. We specialise in high quality products, coupled with incomparable service and dedication to our customers.

Specific attention is given to the development of furniture lighting solutions and products for the KBB market. Our products are illuminating industry-leading brands on a global scale and our current client base includes some of the largest international manufacturers.

Established in 1996 and part of a family business that was first formed in 1966, TLW operates out of a large purpose-designed manufacturing and distribution unit located in Doncaster, UK. The 2.5 acre site is well-equipped with a dedicated suite of offices and an expansive warehouse available to many large clients for call-off ordering with seamless 'just in time' manufacturing processes.

Our loyal staff live and breath the company mission, vision, values and culture statements. We stand for loyalty, honesty, efficiency and service. If you're not already working with us, a warm welcome awaits and we'd love for you to be a part of our continued success.

vev us in a
different light

vev

VEW lighting products are designed and manufactured exclusively by TLW. VEW is about simplicity and ease of use, ensuring that every product in our extensive range is unique, innovative and of the highest possible quality.

Every product in the VEW lighting range has been meticulously designed with our customers and their customers in mind. They are easy to use, order and receive as we have the ability to deliver to any schedule.

The TLW support team are experts in lighting and are here to help our customers every step of the way. Our love of lighting and in-depth knowledge of our vast VEW lighting range makes working with us painless, positive and simple.

GUARANTEE

All VEW products come with a minimum 3 year guarantee. For more information please contact us on **+44 (0)1302 741941** or email **sales@tlwglobal.com**

Please use our colour-coded icons to assist in making sure you are selecting compatible items for the area you wish to install a product. Please feel free to discuss by calling the team on +44(0)1302 741941

For more information on all of these features please go to pages 68-69

Kitchen, bedroom and bathroom furniture is often constructed using materials which are challenging for adhesives to work effectively with. Solid stone worktops are constantly cold and offer very little surface energy whereas cabinetry can sometimes be left with sawdust and swarf which will cause adhesion failure with most LED tapes. At TLW, we have done extensive research to find the best adhesive backing for our VEW LED Tape and other products.

3M VHB is a pressure sensitive adhesive tape that is suitable for use on a wide variety of surfaces and is durable even in changing temperatures. Many of our clients have proven the benefit of this robust adhesive solution and enjoy the peace of mind its longevity brings. All VEW LED tapes use 3M VHB as standard.

Ordering

Here at TLW we are making ordering even easier.

Here is an example of a VEW product: Galaxy Cabinet Light.

The * at the end of the product code indicates that you have options. These are listed below the product code and are broken down into steps. In this example, STEP 1 asks you to select the finish, then STEP 2 shows the available colour temperatures. Simply take the product code and add the letters from the options you require to create the product code you will need for ordering.

For example:

K01-0100PCNW = Finished in Polished Chrome with Natural White colour LED.

K01-0100SSD = Finished in Stainless Steel with Daylight colour LED.

K stands for Kelvins

SMD Technology

SMD, or 'Surface Mounted Diode' LED products contain a permanently fused LED chip on a printed circuit board. This is then enveloped in an epoxy resin.

Key features:

- Good light output with low energy consumption
- Long lifespan
- Wide beam angle for increased spread of light
- Lower energy costs with a high level of performance

COB Technology

COB or "Chip on Board" technology contains a high number of diodes on the same surface, making it extremely bright but keeping the energy consumption very low. It also a high lumen-per-watt ration and heat efficiency.

Key features:

- Very high light output with low energy consumption
- Wide beam angle for increased spread of light
- Long lifespan
- Highly diffused light
- Minimal heat output

Changeable Colour Temperature

SWITCHABLE ADJUSTABLE

CCT stands for 'correlative colour temperature' which indicates the colour appearance of a white LED. Is it defined in Kelvins.

What are CCT switchable products? When a product is CCT switchable, this means that it can be controlled to be 3000K warm white, 4000K natural white or 6000K daylight.

What are CCT adjustable products? CCT adjustable products can be transitioned from 3000K warm white through to 6000K daylight or anything in between with the use of a remote control or a mobile device application.

RGB

Our RGB products allow you to select a light colour from every colour in the rainbow. This effect is stylish, versatile and highly relaxing!

KONNEX SYSTEM

Installing cabinet lighting is a whole lot easier with our simple KONNEX plug and play system. KONNEX has been designed to alleviate stress and reduce installation times and has already proved to be a hit with many electricians who have praised the system.

We believe the KONNEX system is a huge help when installing our VEW range of lighting to your customer's kitchen, bedroom and bathroom - after all, it just KONNEX!

Key features:

- Separate power lead makes it easier to route from power source to the fitting
- Simply unplug the lead from the fitting if your customer wants to change the light
- Individual components allows for easier troubleshooting
- Available throughout the VEW range

VEW tailored solutions

At TLW we have the ability to service OEM clients with designated warehouse space available for stock holding and call off requirements to help seamless 'just in time' manufacturing processes.

We offer an exceptional bespoke service, allowing us to make up VEW Aluminium Profile and LED tape to your exact requirements. This not only saves you money on labour costs and inevitable material wastage, it also saves time so you can focus on production.

Customise your VEW

Looking for something a bit different? We are proud to offer a free consultation and quotation for your individual VEW lighting requirements, bringing your illuminating ideas to life. Please do not hesitate to contact the TLW team if you would like to discuss your needs in more detail.

1. Select your LED tape and profile

2. Send us your specifications

3. We will provide a competitive quote for kit format or individual lengths

We wanted to bring a solution that every business can use to integrate Smart systems into their own products.

Our system uses the latest ZigBee technology to work alongside Amazon Alexa and via a gateway such as Philips Hue to work with Google Home and Siri.

If you are interested in the **VEWsmart™** system and would like more information, please call 01302 238129 or email us on sales@the-lightworks.com

IR Sensor with Remote Sensor

N28-0188

- **Wave activated**
- Switches on the mains side so suitable for mains lighting
- Detection range: 50mm
- Input: 100-240V
- Recess mounted
- Max load power: 250w
- 2m sensor cable
- Dimensions: L76 x W36 x H19mm

13mm

Syno PIR

PIR Sensor Switch with Remote Sensor

N28-0181

- **Motion activated**
- **Automatically switches light off when no motion is detected**
- Automatically turns off after 10-30 seconds of no motion. Length of time is adjustable
- Switches on the mains side so suitable for mains lighting
- Detection range: 2-5m
- Input: 100-240V
- Recess mounted
- Max load power: 250w
- 1.5m sensor cable
- Dimensions: 85 x W35 x H18mm

20mm

For guidance on product codes please see page 6

SenSwitch PIR

PIR Sensor Switch

N28-0003

- **Motion activated**
- **Automatically switches light off after 30 seconds when no motion is detected**
- Switches on 12v side so suitable for 12v lighting
- Detection range: 3.5mm
- Recess/surface mounted
- Max load power: 12v - 40w
- 1.500mm sensor cable
- Dimensions: W15 x D19mm

MICRO 12mm

Double Door IR

IR Double Door Sensor Switch

N28-0001D

- **Door activated**
- Switches on 12v side so suitable for 12v lighting
- Detection range: 50-100mm
- Recess/surface mounted
- Max load power: 12v - 60w
- Cable length: 1100mm
- Dimensions: W15 x D18.8mm

MICRO 12mm

Door IR

IR Door Sensor Switch

N28-0001

- **Door activated**
- Switches on 12v side so suitable for 12v lighting
- Detection range: 50-100mm
- Recess/surface mounted
- Max load power: 12v - 60w
- Cable length: 1100mm
- Dimensions: W15 x L18.8mm

MICRO 12mm

Motion IR

IR Motion Switch

N28-0004

- **Motion activated**
- Switches on 12v side so suitable for 12v lighting
- Detection range: 50-100mm
- Recess/surface mounted
- Max load power: 12v - 60w
- Cable length: 1100mm
- Dimensions: W15 x L18.8mm

MICRO 12mm

Use this simple chart to ensure you select the correct accessories to control your single colour, CCT or RGB lighting products.

	Sensor	Single Zone System	
		Remote	Remote
Single Colour products	Chosen sensor + Driver + Chosen lighting product	 <p>Set Single LED Remote Dimmer & Controller for Single Colour K30-2011SC-KIT</p> <p>+ UNI Driver + Chosen lighting product</p>	 <p>Hub Single Single LED Dimming RF Remote K30-2034</p>  <p>K30-2037-KIT Single Channel Remote Driver</p> <p>+ UNI Driver + Chosen lighting product</p>

Touch

Dimmer Touch Sensor Switch

N28-0005

- Touch activated
- Blue LED light
- Recessed
- Max load power: 12v-60w
- Cable length: 1500mm
- Dimensions: W20 x L14mm

Mirror Touch

Mirror Touch Sensor

N28-0007

- Touch activated sensor for use with mirror lighting
- Invisible switching solution - install behind the mirror surface
- 3M mounting
- Max load power: 12v-60w
- Cable length: 1500mm
- Dimensions: L52 x W32 x D6mm

Invisi Touch

Hidden Dimmer Touch Sensor

N28-0006

- Touch activated
- Invisible switching solution - sensing distance up to 19mm when recessed into a cabinet or under a worktop
- Recessed
- Max load power: 12v-60w
- Cable length: 1500mm
- Dimensions: W42 x L12mm

Dot

Mini Single Colour LED Dimming RF Remote

K30-2034M

- Remote switch and dimming control option
- Dimming range: 0.1% - 100%
- To be used with K30-2037-KIT & K30-2033
- Long life battery included
- Recess/surface mounted
- Dimensions: 38.5mm diameter

Hub Single

Single LED Dimming RF Remote

K30-2034-KIT

- **Controls and dims single colour lights**

- Multi-zone remote control
- Up to 30m range
- Up to 3 different scenes for each zone
- Up to 4 zones
- To be used with K30-2037-KIT & K30-2033
- Can be used in conjunction with K30-2038SC wall dimmer

Hub CCT

CCT LED Dimming RF Remote

K30-2034CCT-KIT

- **Controls and dims CCT lights**

- Multi-zone remote control
- Up to 30m range
- Set 3 different scenes for each zone
- Up to 4 zones
- To be used with K30-2033
- Can be used in conjunction with K30-2038CCT wall dimmer

For guidance on product codes please see page 6

Hub RGB

RGB LED Dimming RF Remote

K30-2035-KIT

- **Controls and dims RGB lights**

- Multi-zone remote control
- Up to 30m range
- Set 3 different scenes for each zone
- Up to 4 zones
- To be used with K30-2033
- Can be used in conjunction with K30-2038RGB wall dimmer

Swipe Single

Single LED Dimming RF Wall Switch

K30-2038SC

- **Set 3 different scenes for each zone**

- **Controls and dims single colour lights**
- Replaces a standard wall switch
- Up to 4 zones
- To be used with K30-2037-KIT & K30-2033-KIT
- Can be used in conjunction with K30-2034-KIT remote

Swipe CCT

CCT LED Dimming RF Wall Switch

K30-2038CCT

- **Set 2 different scenes for each zone**

- **Controls and dims CCT lights**
- Replaces a standard wall switch
- Up to 4 zones
- To be used with K30-2033-KIT
- Can be used in conjunction with K30-2034CCT-KIT remote

Swipe RGB

RGB LED Dimming RF Wall Switch

K30-2038RGB

- **Specific colour sequences can be preset**

- Replaces a standard wall switch
- Up to 4 zones
- 10 colour sequences can be preset
- To be used with K30-2033-KIT
- Can be used in conjunction with K30-2035 remote

Swipe RGB CCT

RGB CCT LED Dimming RF Wall Switch

K30-2051

- Set up to 3 different scenes for each zone
- 240v
- Up to 4 zones - 2 RGB zones, 2 CCT zones
- To be used with K30-2050-KIT
- Can be used in conjunction with K30-2052

Ultra

RGB CCT LED Dimming RF Remote

K30-2052

- Set up to 4 different scenes for each zone
- Up to 4 zones - 2 RGB zones, 2 CCT zones
- To be used with K30-2050-KIT
- Can be used in conjunction with K30-2051

Wi-Fi Multi Channel Receiver

K30-2036

- Compatible with iPhone and Android devices to control single colour, CCT and RGB LED tapes
- App instructions included
- Multi receivers and zones can be programmed
- Converts Wi-Fi signal to RF

Channel

Single Channel Dimming Remote Receiver

K30-2037-KIT

- Switch and dim single colour LED tape
- Up to 288w
- Requires LED driver 12v input
- To be used with K30-3038SC, K30-2034, K30-2034M

4 Channel

4 Channel Dimming Remote Receiver

K30-2033DIM-KIT

- Can be used with single colour or CCT/RGB LED tape
- Up to 720w
- Requires LED driver 12v input
- To be used with K30-2038SC, K30-2034, K30-2038CT, K30-2034CT, K30-2038RGB, K30-2035

5 Channel

5 Channel Dimming Remote Driver

K30-2050-KIT

- Switch and dim RGB+CCT LED tape
- Up to 1440w
- Requires LED driver 12v input
- To be used with K30-2051, K30-2052

Set Single

LED Remote Dimmer & Controller for Single Colour

K30-2011SC-KIT

- Controls single colour lights
- Single-zone remote
- Runs up to 216w at 12v
- On/off function
- Dimming and brightness levels

Set CCT

LED Remote Dimmer & Controller for Colour Temperature

K30-2011CCT-KIT

- Controls CCT lights
- Single-zone remote
- Runs up to 144watts at 12v
- On/Off function
- Adjustable dimming and brightness levels

Set RGB

LED Remote Dimmer & Controller for RGB

K30-2011RGB-KIT

- Controls RGB lights
- Single-zone remote
- On/off function
- Runs up to 216w at 12v
- Adjustable dimming and brightness levels

Driver 8w

12v LED Driver 8w with 4-Port Micro Plug Connector
K10-1200

12v LED Driver 8w For Single Colour, CCT & RGB Controllers
K10-1200UNI

- Max 8w
- Rated input voltage: 200-240AC
- 2m mains cable
- Dimensions: L94.5 x W46.2 x H19.5mm

Driver 15w

12v LED Driver 15w with 6-Port Micro Plug Connector
K10-1220

12v LED Driver 15w For Single Colour, CCT & RGB Controllers
K10-1220UNI

- Max 15w
- Rated input voltage: 200-240AC
- 2m mains cable
- Dimensions: L103 x W35 x H16mm

Driver 30w

12v LED Driver 30w with 6-Port Micro Plug Connector
K10-1230

12v LED Driver 30w For Single Colour, CCT & RGB Controllers
K10-1230UNI

- Max 30w
- Rated input voltage: 200-240AC
- 2m mains cable
- Dimensions: L150 x W45 x H17mm

Driver 50w

12v LED Driver 50w with 6-Port Micro Plug Connector
K10-1250

12v LED Driver 50w For Single Colour, CCT & RGB Controllers
K10-1250UNI

- Max 100w
- Rated input voltage: 100-240AC
- 2m mains cable
- Dimensions: L180 x W65 x H32mm

Driver 100w

12v LED Driver 100w with 6-Port Micro Plug Connector
K10-1290

12v LED Driver 100w For Single Colour, CCT & RGB Controllers
K10-1290UNI

- Max 100w
- Rated input voltage: 100-240AC
- 2m mains cable
- Dimensions: L180 x W65 x H32mm

Driver 132w

12v LED Driver 132w with 6-Port Micro Plug Connector
K10-1292

12v LED Driver 132w For Single Colour, CCT, & RGB Controllers
K10-1292UNI

- Max 132w
- Rated input voltage: 180-264AC
- 2m mains cable
- Dimensions: L182 x W66 x H32mm

Driver 180w

12v LED Driver 180w with 6-Port Micro Plug Connector

K10-1295

12v LED Driver 180w For Single Colour, CCT, & RGB Controllers

K10-1295UNI

- Max 180w
- Rated input voltage: 180-264AC
- 2m mains cable
- Dimensions: L195 x W67 x H31mm

Dimming Driver 25w

12v LED Triac Dimmable Driver 25w

K10-1225DIM

- Max 25w
- Rated input voltage: 180-240AC
- 2m mains cable
- Dimensions: L122 x W52 x H30mm

For guidance on product codes please see page 6

Dimming Driver 50w

12v LED Triac Dimmable Driver 50w

K10-1250DIM

- Max 50w
- Rated input voltage: 180-240AC
- 2m mains cable
- Dimensions: L185 x W62 x H32mm

At TLW we understand how important it is to get lighting absolutely perfect, that's why most VEW products come in different colour temperatures to ensure that every style and preference is catered for. The three colour temperatures we manufacture are 3000K warm white, 4000K natural white and 6000K daylight. Each temperature creates an entirely different finish on the overall look of a room as you can see; warm white is soft and cosy, natural white is pure, clean and versatile and daylight is fresh and modern.

Some products are available in CCT colour temperature adjustable or selectable versions, meaning that one product can transition between all three colour temperatures.

A lot of VEW LED products are IP rated, meaning that they are suitable for use within the bathroom and in other areas of the home that may come into contact with water. It is important to understand IP ratings and IP zones to ensure safe installation of all electrical products.

IP ZONES EXPLAINED

Every bathroom has certain areas that are more at risk of being exposed to water than others. When installing bathroom lighting it is vital that you consult an IP zone map as shown below to identify the level of protection you require in each area.

N.B. SELV stands for Separate extra low voltage.

IP RATINGS EXPLAINED

IP stands for ingress protection and IP ratings simply indicate an LED product's protection against the ingress of solids and liquids. Both digits in the rating indicates something different, see below graph for details:

IP65

No.	FIRST DIGIT: Protection against ingress of foreign bodies e.g. tools, dust, fingers, etc.	SECOND DIGIT: Protection against ingress of liquids i.e. IP44 is protection against solid objects greater than 1mm and water sprayed from all directions.
0	No protection	No protection
1	Protected against solid objects greater than 50mm (e.g. accidental touch by hands)	Protection against vertically falling drops of water (e.g. condensation)
2	Protected against solid objects up to 12mm (e.g. fingers)	Protection against direct sprays of water up to 15 degrees from vertical
3	Protected against solid objects greater than 2.5mm (e.g. tools and wires)	Protection against direct sprays of water up to 60 degrees from vertical
4	Protected against solid objects greater than 1mm (e.g. small tools and wires)	Protection against water sprayed from all directions – limited ingress permitted
5	Protected against dust, limited ingress (e.g. no harmful deposit)	Protected against low pressure jets of water from all directions – limited ingress permitted
6	Totally protected against dust	Protected against high pressure jets of water (use on ship deck) – limited ingress permitted
7		Protected against the effects of immersion between 1.5cm and 1m
8		Protected against long periods of immersion under pressure

This information is intended as a guide and contains several generalisations for illustrative purposes. For more technical information refer to an electrician and specific product data. All data is accurate at time of going to print and the company reserves the right to alter technical specifications at any time and without prior notification. Sizes are a guide only and all colours are subject to levels of accuracy determined by limitations of the printing process.

What does LED stand for?

LED stands for Light Emitting Diode.

What is a watt?

A watt is a unit of power used to quantify the rate of energy transfer from an LED product. It is equivalent to one joule per second. The calculation that is used to derive a watt is the voltage multiplied by the amperage. Basically it's a way to track how much energy a product consumes.

The symbol for wattage is: w, for example: 4.8w

What are lumens?

Lumens is the measurement of brightness that an LED product gives out as perceived by the human eye. It is important to consider the lumen output when purchasing an LED product as this will tell you just how bright the product is going to be.

The symbol for lumens is: lm, for example: 260lm

What is voltage?

Voltage is the pressure from an electrical circuit's power source that pushes charged electrons, or the current, through a conducting loop. This then illuminates an LED light. Most LED products have a voltage of 12 or 24.

The symbol for voltage is: v, for example: 12v

What is a kelvin?

Kelvin is a unit of measurement for the colour temperature of light. There is a Kelvin scale that is used to determine the temperature and shade of white that an LED light gives out. The higher the Kelvin, the cooler the light, the lower the Kelvin, the warmer the light.

What is a mA or mAmp?

mA or a milliamp is a unit of measurement for an electric current flowing through an electrical conductor and a measure of the rate of flow of electrons.

What is an IP rating?

IP ratings are an indication of an electrical product's protection against solid objects such as dust and dirt and moisture. IP stands for ingress protection. The IP rating consists of two digits, the first number refers to the product's protection against solids, the second refers to its protection against liquids.

For example: IP65 rated means a product is dust tight and protected against the ingress of dust, but is also protected against powerful jets of water.

What is an SMD LED?

SMD, or 'Surface Mounted Diode' LED products contain a permanently fused LED chip on a printed circuit board. This is then enveloped in an epoxy resin.

Key features:

- Good light output with low energy consumption
- Wide beam angle for increased spread of light
- Lower energy costs with a high level of performance
- Long lifespan

What is COB?

COB or "Chip on Board" technology contains a high number of diodes on the same surface, making it extremely bright but keeping the energy consumption very low. It also a high lumen-per-watt ration and heat efficiency.

Key features:

- Very high light output with low energy consumption
- Minimal heat output
- Wide beam angle for increased spread of light
- Highly diffused light
- Long lifespan

What is 3M VHB?

3M VHB are a family of tapes with double-sided foam tapes made from high performance acrylic adhesives on the back of them. The superior performance of 3M VHB Tapes means they can often be used to replace mechanical fasteners for joining a wide range of materials.

What is KONNEX?

The KONNEX system is unique to TLW products and is a simple plug and play system that allows you install our lighting products more easily.

The key features of this system include:

- Separate power lead for products which makes it easier to route power from the source straight to the fitting
- Simple and easy to unplug the lead from the fitting if you'd like to change the light
- Products have individual components which allows for easier troubleshooting

What is RGB?

RGB simply stands for 'red, green and blue'. An RGB LED product has the ability to combine these three colours to produce over 16 million hues of coloured light.

What is CCT?

CCT stands for 'correlative colour temperature' which indicates the colour appearance of a white LED. Is it defined in Kelvins.

What are CCT switchable products?

When a product is CCT switchable, this means that it can be controlled to be 3000K warm white, 4000K natural white or 6000K daylight.

What are CCT adjustable products?

CCT adjustable products can be transitioned from 3000K warm white through to 6000K daylight or anything in between with the use of a remote control or a mobile device application.

What is CRI?

CRI stands for 'colour rendering index'. It is simply a measure of a light's ability to reveal the colours of various objects in comparison with a natural light source.

What is IR?

If a sensor is an IR sensor, this stands for infrared. This means that the sensor emits an infrared beam up to a certain distance away from itself that can detect motion. These can be used in 2 ways: as a door sensor or as a wave/swipe sensor.

What is PIR?

If a sensor is a PIR sensor, this stands for passive infrared, meaning that the sensor is activated when an object enters its field of view. It can also be called person in range, meaning that when a person or a moving object moves within the sensors detection range the lights will come on.
