

# SINKS 2013

COLOUR  
YOUR LIFE

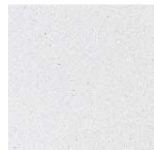

# CRISTALITE+®

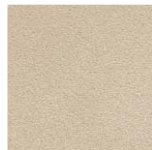

Pages 4-11

The new generation of Cristalite has been developed over 30 years and now features substantially improved properties. It is now even easier to clean and has a new intensity of colour.

CRISTALITE is food-safe, UV stable and all sinks are finished with Schock Antibac. This natural antibacterial protection system, developed by Schock, inhibits 95% of bacterial growth, which makes doing kitchen chores a more hygienic and carefree experience.

# SCHOCK COLOUR YOUR LIFE

## Granite Sinks

Around 80% of the material used in Schock sinks is quartz, the hardest constituent of granite. Thus, they are well known as 'granite sinks'. The granite used in Schock sinks is combined with high grade acrylic to produce a hardened composite material that is resistant to scratches, cracking, stains and is responsible for the long life of the sinks.

The world of Schock materials currently comprises of two materials, both developed in-house in Germany by Schock. More than 40 active patents demonstrate the company's leading position and its unique capacity for innovation in the field of granite sinks.

## CARE & CLEANING

### Daily regular cleaning:

Clean using washing-up liquid and hot water.

### Stubborn Stains:

Clean using Cream cleaner with a 'Scotchbrite Pad'

### Mineral Deposits:

Soak in a solution of 3 parts hot water and 1 part white vinegar.

### Aluminium Marks:

Remove by using 'Shiny sink' or 'Astonish' paste.

### Bleach Cleaning: (only recommended with Cristalite not Cristadur)

Use diluted solution - avoid soaking for long periods as this can damage the steel/chrome waste fitting.

### After Cleaning:

Always rinse with clean water to remove any cleaner residue and then dry off with a soft cloth to prevent limescale build-up.

## Topmount

This installation requires the sink to be mounted into the work top from the top. This installation type is suitable for all work top types including laminated chipboard.

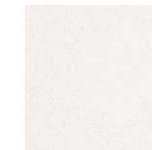

## Undermount

This installation requires the sink to be fitted to the work top from the underside. This installation type is only suitable for solid surface work tops such as Granite, Marble or wood.

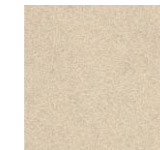

## CRISTADUR® Pages 12-17

In addition to the great attributes of CRISTALITE+ the premium CRISTADUR material has an ultra-fine structure resulting in unprecedented ease of care and featuring a dirt repellent effect (the dirt simply runs off). Dirt that could be a breeding ground for bacteria finds it impossible to stick to the material. An added benefit of CRISTADUR is its silky-smooth surface - it's wonderfully soft to touch whilst offering maximum resistance to stains and scratches.

# PRIMUS CRISTALITE<sup>+</sup>

The **Primus's** restrained styling and competitive pricing have ensured this range to be one of our most popular. The single bowl model boasts a particularly generously dimensioned bowl - great for big things!

A really useful drain recess on the D 100 - ideal for emptying leftover drinks when the washing bowl is in use.

A neat solution for disguising the overflow

## The Perfect Match

For the first time it is possible to achieve a 100% colour match with the sink and tap. A patented sheathing technique has been developed by Schöck. The Cristalite/Cristadur casing also ensures extreme durability and will withstand impacts with heavy pots and extremes of temperature - it bravely stands up to the rigours of the busy kitchen - so chipped paint on lacquered taps is a thing of the past.

Recommended range see page 19.

# DOMUS CRISTALITE+®

The **Domos** sinks have sharp geometric lines, providing cutting edge minimalism in the kitchen. Its many design attributes include a deeply recessed drainer that helps contain spills and accommodates a glass chopping board that can slide across both the drainer and bowls. It is also slightly larger than most of its peers, thus enabling it to be fitted as a replacement sink without the need to renew expensive work surfaces.

# CAMPUS

## CRISTALITE<sup>+</sup>

The **Campus** sinks have a few more curves than our other Schöck models and blend in beautifully in both modern and more traditional kitchens. Both these sinks have really useful accessories that add to their versatility. The single bowl model also has a usefully large bowl for the ever growing oven trays. See page 2 to learn more about Cristalite and get a better view of the colours.

The **Horizont** have a subtly sophisticated design employing all the minimalist rules but with an added flourish, for example, the sheer drainer has a unique central draining channel and the 1.5 bowl model has had the half bowl unusually positioned on the outside of the main bowl. The crowning glory for the D150 model only is a pair of sleek black glass chopping boards that slide elegantly across the sink, when not in use the sink can be 'closed off' creating a calm and uncluttered effect.
