-------	----

Cooks like to have the best ingredients.

Starting with the mixer. Which is why we endeavour to manufacture products that please the senses. That delight the eye - and the hand. For which we have received numerous global design awards. Choosing a Hansgrohe or Axor mixer is also always an informed choice because you are acquiring a long-lasting product that sets standards in functionality and quality in line with our culture of innovation - after all, it is the most frequently used item in the kitchen: we use the mixer up to 90 times a day. And don't you think that cooking pleasure should start with the mixer?

The Hansgrohe company can look back on over 100 years of family tradition, and is regarded as one of the world's leading manufacturers of mixers and showers. The company is based in the Black Forest, Germany. In addition to the established premium brand of Hansgrohe, the designer brand Axor was created in 1993.

Axor Starck

04
05

Iconic sink units by the man who is probably the most famous designer in the world. Philippe Starck has been designing for Axor since 1994. The French designer's mixers are notable for the elementary shapes and clear functions that follow the principle of minimalist aesthetics. The characteristic feature of the collection is the easy-to-use joystick handle.

Axor Starck

Individually adjustable swivel range (110°/150°/360°)

Pull-out spray with 2 spray types (normal/shower spray)

ComfortZone

Joystick handle

Variable handle position (right or left)

Single-lever kitchen mixer

with or without pull-out spray

The Axor Starck design is minimalist and flowing - from the basic body to the spout, and from the spout to the pull-out spray. Axor Starck is available in two functional mixer versions: with the swivel spout, which can be set at any of three levels to suit your personal preferences, and a second version with a pull-out spray that enables you to reach any part of the basin and rinse off plates with ease.

Swivel spout

Axor Starck Semi-Pro

Semi-Pro **Single-lever kitchen mixer**

Axor Starck Semi-Pro is the mixer for serious amateur chefs. With its 360° swivel spout and minimalist design, it is ideal for double sinks and sink units that are integrated in the kitchen as island solutions.

The Italian architect and designer Antonio Citterio bows to the element water with an elegantly restrained range of kitchen mixers. The exclusive, precisely formed handle is particularly striking. Its length and flatness make it extremely ergonomic in use. The gentleman of design also designed a second kitchen mixer with extremely slender, tall lines that echo an urban aesthetic.

MODERNITÀ**

Axor Citterio

Semi-Pro **Single-lever kitchen mixer**

Stainless steel spring

Swivel spout (360°)

Axor Citterio is available in three different functional versions, up to high-end functionality with a stainless steel spring that gives the spout maximum flexibility. All share the same slender lines and ultra ergonomic handle that is really easy to use - even with dirty or soapy hands.

Axor Citterio

Pull-out spray with two spray modes (normal/shower spray)

ComfortZone

Individually adjustable swivel range (110°/150°/360°)

Ergonomic handle

(110°/150°/360°)

**2-hole Single-lever kitchen
mixer** with pull-out spray

The Axor Citterio M version with
pull-out spray provides a normal
spray and a shower spray.

Axor Citterio M

14
15

2-hole Single-lever kitchen mixer with swivel spout

The eye-catching spout can be rotated freely by 360° or locked in position at 110° or 150°. The separate lever handle can be installed on any side of the sink. At the back, for instance, out of the reach of children's hands, or on the left side of the bowl, ergonomically practical for left-handed people - whichever you prefer.

FORM FOLLOWS EMOTION.

WHEN IS A MIXER VERY GOOD?
WHEN WE TOUCH IT AND USE IT.

The German design studio Phoenix Design, under Andreas Haug and Tom Schönherr, has previously designed numerous kitchen mixers for Hansgrohe and Axor. They now develop the first Axor kitchen mixer for the wall.

Axor Uno² / **Axor** Uno

Axor Uno²

Handle can be positioned on the left or right

Joystick handle for easy use

Swivel spout

Telescopic spout for maximum freedom

Single-lever kitchen mixer

concealed

The Axor Uno² wall mixer is yet another smart solution that provides more freedom of movement at the sink. The integrated telescopic spout is easy to pull out and swivel, increasing the range around the sink.

Axor Uno² / Axor Uno

Swivel spout
(360°)

ComfortZone

Variable handle position
(left or right)

Single-lever kitchen mixer

with swivel spout

Axor Uno and Axor Uno² are two kitchen mixer ranges with a distinct geometric design language that combines easily with any kitchen ambience. Axor Uno² is developed stylistically from the Axor Uno, although its shape is slightly more slender and minimalistic. The spout of each mixer tap swivels by 360°, making life easy when washing up and cooking.

Individually adjustable
swivel range
(110°/150°/360°)

PURE. CLEAR. SENSUOUS.

THE FASCINATING COMBINATION
OF DESIGN AND TECHNOLOGY.

Hansgrohe **PuraVida**[®]

PuraVida - the name of the mixer perfectly expresses the purist design language and pleasure in handling the essential element water. The focal point at the sink with its unique DualFinish - the brushed stainless steel of the mixer body meets the polished top of the spout - was developed in collaboration with the renowned Phoenix Design company. A delightful, user-friendly way to celebrate cooking.

Hansgrohe PuraVida®

2-hole electronic kitchen mixer

Water flows at the touch of a button. Just as much as you need and at the temperature you want. You can pre-set the temperature and the amount of water as you wish and save your choice. Hansgrohe smart functionality provides you with maximum comfort at the sink. It also helps that you can position the electronic control unit at the sink in the ideal position for you.

ComfortZone

Hansgrohe mixers give you a tremendous ComfortZone. High spouts offer plenty of space for movement and make it easy to fill tall pots and vases.

Cleaning

A single, multifunctional control element: 1 push for cold water, 2 pushes for mixed water, 3 pushes for hot water. For individual temperature preference: turn the control element. Push and turn to adjust water volume. And the mixer also offers a cleaning mode, temporarily preventing water flow during cleaning and a thermostatic control prevents scalding.

DualFinish in stainless steel effect

The PuraVida mixer with DualFinish will be the focal point in any kitchen: the seamless transition from the brushed body to the polished spout enhances the exclusive quality. The mixer is finished in the highly durable PVD method, which makes it highly resistant to the usual daily stresses.

Hansgrohe **PuraVida**[®]

2-hole Single-lever kitchen mixer

Classic styling is another option: with the single-lever version, where you control the water quantity and temperature manually using an elegant lever handle. Here too, you can install the handle wherever you like around the sink.

EVERYTHING THAT MAKES AN EXCELLENT KITCHEN HELPER.

MODERN DESIGN THAT WILL FIT
ANYWHERE. FUNCTIONAL DETAILS
THAT MAKE COOKING A JOY.

Hansgrohe **Talis**[®]

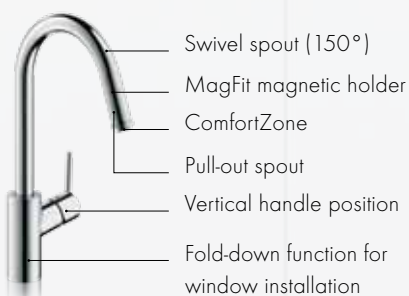

Talis is available in several versions: from the basic to the mixer with a high spout; from the pull-out spout to the pull-out spray. A range of mixers that enables you to increase your range around the sink with ease. Perhaps your sink is in front of the window? Then choose the mixer with the fold-down function: lift the mixer, lay it down and open the window.

Hansgrohe **Talis[®]S² Variarc / Talis[®]S**

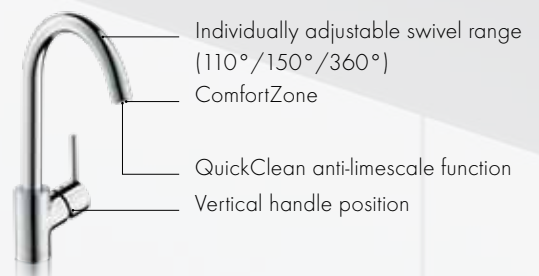

Form and functionality enter into an aesthetic symbiosis. Hansgrohe Talis is slender, stylish and fitted with a simple pin handle. The high swivel spout with ComfortZone leaves a pleasant amount of space between the mixer and sink and offers greater freedom of movement when filling tall vessels.

WITH PRACTICALITY.

Hansgrohe **Focus**[®]

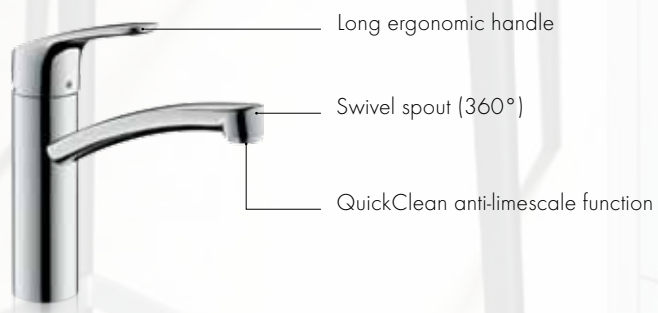

Hansgrohe Focus is the timeless mixer line with élan. The range includes options with high swivel spouts that swivel by up to 360° and user-friendly basic versions. The mixers are available in both chrome and stainless steel to harmonise with the finishes of ovens, refrigerators, extractor hoods and handles.

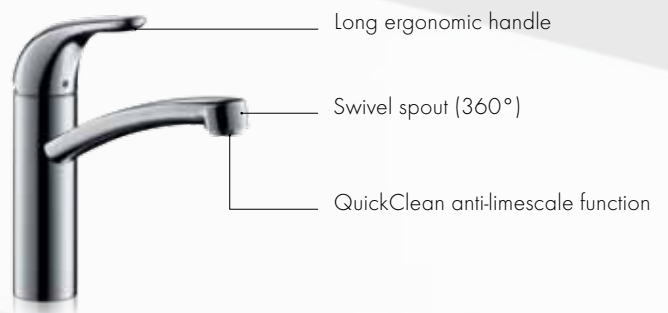

Hansgrohe **Focus**[®]

ALL THE PRODUCT BENEFITS FROM PULL-OUT SPRAY TO SWIVEL RANGE AT A GLANCE.

Ceramic or joystick cartridge

Thanks to the specially hardened plastics, the joystick, M1 and M2 cartridges help to ensure the mixer has a long functional life.

Boltic handle lock

The wedge-shaped control lever of the Boltic handle prevents the handle wobbling in use.

QuickClean

It is very difficult for limescale to take hold on the elastic disc, and if it does, it can easily be rubbed away with a finger.

Easy installation

Flexible connections make it easier to install the mixer.

PEX hoses

The PEX hoses are temperature-resistant and neutral in taste and odour.

Quality made by Hansgrohe

You are acquiring a quality product that has been developed and produced by Hansgrohe.

Swivel function

The mixers offer you either a limited swivel range (110°/120°/150°) or all-round freedom of movement (360°).

Pull-out spray/spout

The pull-out spray/spout increases the operating range around the sink.

MagFit magnetic holder

Thanks to the MagFit function, the hose slides back almost silently, and positively locks back into place in the mixer spout.

QuickConnect for pull-out spray hoses

Thanks to the QuickConnect function, the hoses are particularly easy to fit.

Spray modes pull-out spray

The pull-out spray also offers two modes of spray, normal and shower, which are easy to change over.

Ergonomic handles

Long flat handles for ergonomic control.

Vertical handle position

Thanks to the vertical handle position this item can be installed even where there is little space between the mixer and wall. And hot water runs when the handle is in the vertical position that is more difficult for children's hands to reach. Cold water runs when the handle is opened in the horizontal position.

Separation of spout and control unit

The handle can be installed flexibly if preferred.

Variable handle positioning

The handle can be installed on the left or right as preferred.

ComfortZone

The ultra high spout offers plenty of space and is ideal for filling containers.

Telescopic function

A telescopic pull-out will provide you with even more flexibility.

Window installation

Fold-down function: ideal for installation in front of a window; simply lift the mixer up when required and lay it flat.

Stainless steel effect PVD

Surfaces in stainless steel effect are made using durable PVD technology, and are particularly wear and scratch resistant.

Kitchen shut-off valve

Available as an option in the same design as any Hansgrohe or Axor kitchen mixer for external device shut-off, such as the dishwasher.
